-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donohoe in view of Miller and Tobing et al.

Donohoe discloses the use of a drumhead for musical drums comprising a circular membrane of plastic film (column 3, lines 1-5) having a substantially flat crown and a contoured outer rim in a circular hoop; an annular formation of plastic film intimately and entirely adhered by adhesive (16) .

Donohoe does not disclose the use of a plurality of relief irregularities in the outer most 40%.

Miller et al discloses the use of a drum with irregularities in the outer most 40% (see figure 1).

Donohoe and Miller does not disclose the use of viscoelastic adhesive.

Tobing discloses the use of a viscoelastic adhesive that adhere strongly to a variety of substrates (column 1 lines 30-32). Tobing also discloses the use of pressure sensitive adhesive (see abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Donohoe to include the

irregularities as disclosed by Miller and the adhesive as disclosed by Tobing in order to a drum device with tone control and strong adhering capabilities.

3. Claims 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 10-25 are allowed.

5. The indicated allowability of claims 5, and 7-9 is withdrawn in view of the newly discovered references.

6. Papers related to this application may be submitted to Group 2800 by facsimile transmission. Papers should be faxed to Group 2800 via the PTO 2800 Fax Center at 703-872-9306.
